# Blithe Bundesbankers hurt D-Mark

By Simon Kuper

The dollar and pound soared day as Bundesbank officials suggested that European ceed. The two currencies rose sharply because they finally overcame waves of selling at key technical lev-

D-Mark, 2.6 pfennigs above Monday's London close. The pound was at DM3.0542 to the German currency, 4 pfennigs above Monday. The currencies rose further with US stocks and bonds after Mr Alan Greenspan, chairman of the Federal Reserve, said in his Humphrey-Hawkins testimony in the House of Representatives that US inflation would remain low this year but would rise in 1998. He implied there was no need for interest rates to

rise in the short term. Bundesbank council member, had earlier joined some of his colleagues in acceptagainst the D-Mark yester- ing France's virtual admission that it would miss the key entry condition for Emu. monetary imion would pro- The Bundesbank's stance reduced fears of a delay to Emu. The D-Mark is still thought to be set to merge

into a weak euro. Mr Dominique Strauss-Late yesterday the dollar Kahn, French finance miniswas at DM1.8220 to the ter, admitted on Monday after France's audit of state finances that the country's budget deficit this year would probably exceed 3.0 per cent of gross domestic product, the Emu entry criterion.

But several Bundesbank officials later said they could

live with such a deficit. Mr Mr Hans-Jürgen Koebnick, Koebnick said yesterday that the Bonn government "should explain to the people that the euro can very well be stable even if Germany's deficit is 3.2 per cent and France's deficit is 3.3 per cent." Mr Avinash Persaud, head of currency research at J.P. Morgan in Europe, said: "The fact that France seems to be trying to meet the criterion now

> The dollar, which had struggled for a week against resistance at DMLSO to the D-Mark, raced ahead after breaking the DM1.8040 level. Mr Marc Chandler, senior corrency strategist at Deutsche Morgan Grenfell in New York, said: "There were finally no more big sellers left at DM1.80."

seems to be the important

But the US currency slipped slightly against the yen to Y1156, and the yen rose Y0.70 against the D-Mark to Y63.78. The

## Breakwater in two zinc deals

Breakwater Resources of Canada is digging deeper into zinc production with two deals in two days. The company, which already has two mines scheduled to produce 120,000 tonnes of zinc, 22,000 tonnes of lead and 2m ounces of silver this year, is to buy the assets of the Bougrine leadzinc mine in Tunisia, which closed last year because of low prices, as well as the El Toqui zinc-gold mine in Chile.

Breakwater will pay US\$19.3m for Bougrine and will spend \$7m to upgrade it. Bougrine cost \$30m to develop and inmet of Canada, which owned 48 per cent, has already written off all its investment. In 1995 Bougrine produced 75,768 tonnes of zinc and 9,386 tonnes of lead.

El Toqui has three mines, two at present out of production. The third, Dona Rosa, last year produced 32,423 tonnes of zinc and 6,250 ounces of gold. Breakwater. which is paying Barrick Gold \$6m in cash, putting in working capital and paying a royalty on El Toqui's output, said the two deals will increase its proven and probable zinc reserves by 50 per cent as well as boost earnings and cash flow.

#### TURKISH MINING

#### Eurogold denies suspension

Eurogold, the joint venture company developing Turkey's first gold mine, yesterday denied that it was suspending operations on the orders of the country's supreme court. Mr Jack Testard, the general manager of Eurogold, said he had received no official communication from the court. He said construction work at the mine was continuing normally and that he expected production to start at the end of the year as planned. Eurogold plans to produce at least three tonnes of gold a year.

Eurogold is two-thirds owned by La Source, a joint venture between Australia's Normandy Poseidon and BRGM. France's privatised geological survey. Inmet Corporation of Canada owns the remaining one-third.

The company has invested \$15m in the project but has run into fierce resistance from local villagers, left-wing politicians and environmentalists alarmed by its planned use of cyanide to extract gold from the ore.

#### ■ OIL EXPLORATION

#### Greece signs agreement

Greece yesterday signed an exploration agreement with a consortium of international oil companies to prospect in western Greece. Development ministry officials said the companies would invest over \$37m over the next six years in exploring two separate concessions.

Enterprise Oil of the UK; Union Texas, the US producer; and MOL of Hungary, are to prospect two onshore blocks in the north-western Peloponnese and Epirus, south of Albania's oil-producing region and drill exploratory wells. Greece's state-owned oil exploration company, DEP-EKY, will have a 12 per cent stake in the consortium and would participate in developing any oilfield discovered, the offi-Kerin Hope, Athens

# Fischler stays cool under fire |Fund buying

Everyone knows it will not be easy to reach Europe-wide agreement on reforming the Common Agricultural Policy. But yesterday brought a glimpse of just how intractable the negotiations are likely to be.

Mr Franz Fischler, the commissioner, answered questions by satellite from agriculture journalists around the European Union on the Agenda 2000 reforms unveiled in Brussels last week.

The questions came thick and fast from Athens, Helsinki, the Hague, London and Dublin. There were few common themes, little consensus and much preoccupation with the individual concerns of each country.

Asked about the hostile response of some continental European farming lobbies to the reforms. Mr Fischler said: "We've got to be aware that the taxpayer is asking more and more why we're spending this money, and on what? The readiness of gov-

lrish journalists wanted to know if the next round of in each member state. CAP reform would be any more successful than the to ensure the price effect is 1992 MacSharry reforms in passed on by pursuing the sive

"It's up to member states

ernments to finance sur-shops. Mr Fischler said that sumer policy," he said. "It's pluses in this way has also was the aim - but retail important that the reduction in prices should trickle down to the consumer."

From northern Europe he came under pressure to comment on the merits of intenbeef production, while from Athens in the south came bitter criticism about the lack of compensation payments to the olive oil sector.

Mr Fischler expressed some astonishment. "But there are not going to be any price reductions in this sector," he said. "Indeed, we're attempting to structure the sector to maximise the market outlets."

Next he had to defend himself against charges from the UK that the proposals were woefully short of a role for environmentally friendly farming. "We're coming up with a whole series of proposals aimed at improving the environmental conditions related to agricultural practices," he insisted.

The details of the reforms had yet to be fleshed out. But some farmers' organisations criticised the proposals as "too environmentallyfriendly", taking insufficient account of the demands of agricultural production.

"So I think perhaps we're going in the right direction," he smiled. Mr Fischler remained cool

under fire. No doubt he saw the satellite interchange as a gentle induction to the real fight ahead, when detailed proposals are discussed formally by EU farm ministers

# boosts sugar down \$42 on the previous

MARKETS REPORT By Gary Mead

and Kenneth Gooding

London and New York showed signs of renewed interest yesterday, with steady investment fund buying driving up prices.

On the London International Financial Futures Exchange the screen-traded sugar contract for the nearest month, October, reached a peak of \$328 a tonne in afternoon trading - the highest since September last year and close to the contract high of \$329.70.

On New York's Coffee, Sugar and Cocoa Exchange the October contract reached a record 11.65 cents a pound, though later fell back to 11.56 cents, 0.3 cents higher on the day. Specialists said no new fundamental factors were influencing the market and the interest was driven

by fund speculation. Elsewhere on Liffe. robusta coffee futures for September rallied slightly after falling to a six-month low of \$1,477 a tonne in the

some had anticipated, given that weather forecasters are now almost certain that Bra-The normally lacklustre zil's crop will escape frost, sugar futures markets in The September contract also improved on the CSCE; in later trading it had gained 11.65 cents to 170.50 cents a pound amid renewed fund interest

day. That was better than

Cocoa continued in the doldrums on projections of good crops in Ivory Coast and elsewhere. On Liffe the September contract ended £10 lower at £975 a tonne, having slipped as low as £968 earlier in the day. London Metal Exchange

zinc moved to a seven-year high of \$1,552.50 a tonne in late trading and also briefly went into backwardation when there is a premium for immediate delivery. One analyst suggested some investment funds had been squeezing the market.

Stocks of copper in LME warehouses rose by a hefty 11.600 tonnes to 195.950 tonnes. The premium for copper for immediate delivery, compared with threemonth metal, eased from \$129 a tonne overnight to \$88 afternoon. By the close they at one point. By the close it had recovered to \$1,505, was back to \$100 a tonne.
